## MARYLAND AVIATION ADMINISTRATION ENVIRONMENTAL BUILDING INSPECTION

---

The Maryland Aviation Administration (MAA) will be performing the required tri-annual re-inspections for asbestos-containing materials (ACM) at the BWI Marshall Airport Terminal Building and Outbuildings starting on or about September 27, 2021, with an anticipated completion date of December 31, 2021. The Maryland Department of the Environment requires that State agencies perform visual inspections on an annual basis and comprehensive re-inspection every three years.

The inspection process will consist of a visual inspection of materials that are known or assumed to contain asbestos. In addition to the visual inspection, sampling of recently installed building materials may be required. If sampling is required, the sample size which is approximately the area of a thumbnail will be collected in inconspicuous areas and if necessary, areas where samples are collected will be repaired. The inspection process in each area is brief; however, it may be necessary to access areas above ceilings, inside wall chases, etc.

The survey will be performed by a consultant to the MAA, EA Engineering, Science and Technology, PBC (EA) and its subcontractor Aria Environmental, Inc. (Aria). Each EA and Aria Inspector is accredited to perform asbestos inspections by the U.S. Environmental Protection Agency and by the Maryland Department of the Environment. Each inspector has obtained a BWI Marshall Airport identification badge and will need to enter all public and leased spaces to conduct these inspections. The inspections will be conducted during normal business hours.

Your cooperation with this effort is greatly appreciated.

The points of contact are Mark Williams at 410-859-7448 or Evans Browne at 410-859-7806.
